

# EOH YOUTH JOB CREATION INITIATIVE

# LIVES ARE CHANGED WHEN BUSINESS GETS INVOLVED

## How we can help?

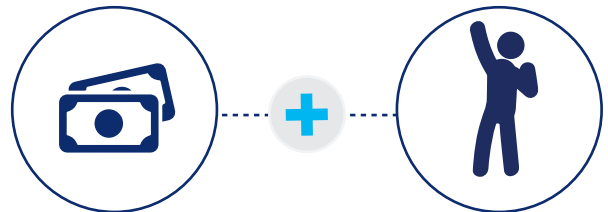

Over the years, EOH has created models and guidelines that help our partners to fast-track the implementation of work-experience programmes. There are four key ways in which EOH can assist you in implementing an internship or learnership programme within your business.

### 1. General Support and Guidance

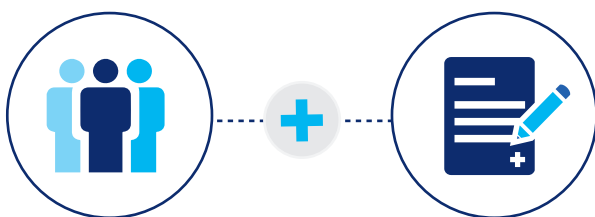

For templates and simple 'how-to' guides on implementing work experience programmes, visit our dedicated platform.

### 3. Application for Hosting Interns or Learners

EOH in partnership with various funding entities will periodically be able to offer funding for the support of developing and/or employing learners and interns.

### 2. Access to Intern and Learner Applicants

The EOH Youth Job Creation Initiative facilitates the matching of your learner or intern requirements with the details of our applicants.

### 4. Engage our full range of Learning and Development services

EOH offers a broad range of learning and development services and products should you require external support.
